

Acme Robotics - Expense Reimbursement Policy

Effective Date: January 1, 2026

All employees may submit expense reports for business-related purchases through the Finance portal within 30 days of the purchase date. Reports submitted after 30 days require director approval before reimbursement.

Approved categories include client travel, conference registration, team meals up to \$40 per person, and software subscriptions under \$200 per year that are not already covered by IT.

Receipts are required for any single expense over \$25. Expenses without a receipt will be reimbursed only with written manager approval, and are capped at \$50 per incident.

Reimbursements are processed on the 15th and last business day of each month. Employees using a personal card for travel will be reimbursed at the standard mileage rate of \$0.67 per mile for any driving beyond their normal commute.

Alcohol is reimbursable only when directly tied to a client dinner and does not exceed \$60 per person. Personal entertainment, gym memberships, and home office furniture beyond the standard \$500 stipend are not reimbursable under this policy.

Questions about a specific expense should be directed to the Finance team before the purchase is made, not after submission.
